

**Luigi Barazzetti** is a Professor of Modern Recording and Monitoring Techniques at the Polytechnic University of Milan, Italy. He holds a Master's degree in Engineering Surveying and a Ph.D. in Geomatics. He is also a faculty member of the Carleton Immersive Media Studio (CIMS) Lab in Ottawa, Canada. He has participated in numerous national and international projects on heritage documentation and monitoring, in collaboration with institutions such as the Carleton Immersive Media Studio, the Getty Conservation Institute, the Veneranda Fabbrica del Duomo di Milano, Cardiff University, the Bahrain Authority for Culture and Antiquities, ENI S.p.A., and several EU-funded initiatives. His research focuses on photogrammetry, laser scanning, and computer vision for cultural heritage documentation, as well as sensor technologies for structural health monitoring. He is a member of ISPRS, CIPA Heritage Documentation, and ICOMOS, and has authored more than 150 scientific publications.
