

Miquel Reina Ortiz is an Assistant Professor in the School of Architecture of the Faculty of Environmental Design at the Université de Montréal, where he is responsible for the master and the microprogram program in conservation of built heritage. He holds a Ph.D. in architecture from the Azrieli School of Architecture and Urbanism at Carleton University. His research concerns the relationship between different scales of intervention in the urban conservation of the historic city. He has developed his expertise in heritage documentation with research projects on World Heritage Sites and the generation of new digital workflows applied to the field of heritage conservation. He graduated with honours in architecture and completed a master of science in restoration and rehabilitation from the ETSAB Barcelona School of Architecture at the Universitat Politècnica de Catalunya.
